Or

(b) Give an introduction to a stress interview

SECTION C — ($3 \times 10 = 30$ marks)

Answer any THREE questions.

16. Renewable energy sources play a crucial role in sustainable development by providing clean and eco-friendly alternatives to fossil fuels. One of the most widely used sources is solar energy which is harnessed from the sun using solar panels. It is commonly utilized for electricity generation and heating purposes. Another important renewable source is wind energy, where wind turbines convert wind power into electricity, offering a clean and sustainable solution for energy needs. Hydropower is another significant source, generated by utilizing flowing or falling water, often through dams, to produce electricity efficiently. Biomass energy is derived from organic materials such as wood, crop waste, and animal manure, which are used to generate heat and electricity. Lastly. geothermal energy comes from the Earths internal heat and is used for both electricity generation and direct heating applications. These renewable energy sources
